

## ANTI-VIBRATION MOUNTS &amp; ISOLATORS

# Shock Proof Anti-Vibration Mountings

## INDICATIVE PRICE

**INR 50**

per piece, ex-works Nashik

## MINIMUM ORDER

**500 Piece**

## MATERIALS

Natural Rubber

## DESCRIPTION

High-quality Rubber Mounts with Metal Studs designed for vibration isolation, shock absorption and stable mounting of machinery and equipment. Manufactured from durable rubber compounds with securely integrated threaded metal studs. Available in various diameters, heights, hardness grades, thread sizes and load capacities as per customer requirements.

- Motors, pumps & compressors
- Generators and industrial machinery
- Machine tools and equipment
- Electrical panels and control equipment
- HVAC systems
- Automotive and engineering applications
- Vibration and shock isolation

## SPECIFICATION

|                    |                                                     |               |                          |
|--------------------|-----------------------------------------------------|---------------|--------------------------|
| Mount Type         | Stud Mount                                          | Load Capacity | 20kg to 7Tons            |
| Thread Size        | M10                                                 | Body Material | Natural Rubber           |
| Diameter           | 50 mm                                               | Material      | Rubber                   |
| Usage/Application  | Industrial Purpose                                  | Features      | To Avoid Vibrations      |
| Finishing          | Painted                                             | Height        | 50 mm                    |
| Application        | Compressors, Pumps, Motors, Generators/DG Sets, CNC | Reduces       | Shock, Noise, Vibrations |
| Hardness (Shore A) | 60 Shore A                                          | Product Type  | Anti-Vibration Mountings |
